Friendly products for 2009 taking small steps to show concern for our home:

100% chemical-free home cleaning with the Lotus® Sanitizing System.

Turns tap water into and odorless and safe sanitizer and deodorizer. This is 3,000 times faster and 50% stronger than bleach. It is safe for babies, pets and people with allergies and sensitive skin. Save on chemical household cleaners. EPA

Approved, Time Magazine – Best Inventions of the Year 2006.

Recycled & Recyclable Tumbler (Green)

From Aladdin: Add a little green to your morning.

Your drink makes you happy and so should your mug. This one's made with eCycle®, 100% recycled polypropylene containing 25% post-consumer content. It's also recyclable wherever [5] plastic is collected and features a splash-proof lid for easy drinking. Features: • Recycled and Recyclable. Made with eCycle. • Car cup friendly. Drop the between-the-knees balancing act. • Dishwasher safe. Ditch the dirty work.

- Microwavable. Heat + heat again.
- eCycle® makes it easy to do the right thing. It is our proprietary mix of post-consumer recycled plastics.

Sip Sustainably

At Aladdin we believe you have a choice. A choice to keep you and the earth happier and healthier. That is why we created a line of products that give you that choice. Be happy, be healthy choose Aladdin Sustain.

BPA-Free Products

Concerned about BPA in your plastic bottle?

We offer you a choice. See our BPA-free products.

ScanPan GreenTek: Patented non-stick technology, without the use of PFOA during the non-stick production process. As mandated by the EPA for the year 2015. No PFOA in our cookware coating or in the manufacturing process.

Be Kind To Your Planet

- Use less energy
 - Reduce cooking time
 - Keep heat in

Kuhn Rikon Duromatic Pressure Cookers save you time and money and conserve the planet's precious resources. Between the pressure cooker's quick heat up time, and the super fast cooking times, you use up to 70% less energy, saving resources. It's the pressure cooker's unique functionality that helps you save energy--Regular cooking methods reach only 212 degrees, but under pressure, temperatures climb as high as 250 degrees, cooking dishes three to 10 times faster and thus, using less energy.

This shortened cooking time has another benefit, too--with its much shorter cooking times and closed lid, you don't heat up the kitchen, and so don't have to worry about heating up the house in the summertime.

The Duromatic Pressure Cooker's unique Swiss design and durable construction ensures that each pot will provide years of use, with replacement parts readily available.

Our pressure cookers are another way that you and your family can help reduce your carbon footprint on the planet.

Ask for our Duromatic Green Energy Cookware Set at a special promotional cost. Save money and energy.

More Earth-Friendly ideas:

- **Best Manufacturers** makes their products right here in the Pacific Northwest, highest quality hand-made wire whisks **produced in Portland** keeping Northwest workers employed.
